

Stock Melamine Colours & Finishes

November 2025 Revision

Finishes Guide

Strata

Look & Feel: Smooth, matt, very little shine.

Best For: Modern, clean designs where you don't want reflections. Great for cupboards and shelves

Linear

Look & Feel: Lines in the surface with a mix of matt and gloss.

Best For: Cupboard doors and panels where you want a stylish, grain-like effect.

Peen

Look & Feel: Slightly bumpy, like fine wood grain.

Best For: Kitchen units, wardrobes and shelves — hides fingerprints and light scratches well.

Fusion

Look & Feel: Soft, matt, natural wood look.

Best For: Doors and furniture where you want a warm, realistic wood effect.

Intrinsic

Look & Feel: Light wood grain that looks natural and fresh.

Best For: Bright, modern spaces like kitchens, bedrooms, or offices.

Alpine (Novolam)

Look & Feel: Deep wood grain you can feel with your hand.

Best For: Feature cupboards or furniture where you want a textured, natural feel.

Textured (Novolam)

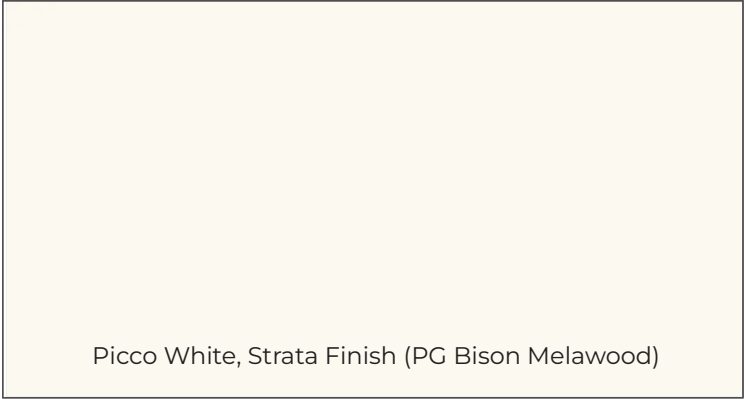

Look & Feel: Gentle wood grain texture — not too smooth, not too rough.

Best For: All-round use for cupboards, shelves, and panels.

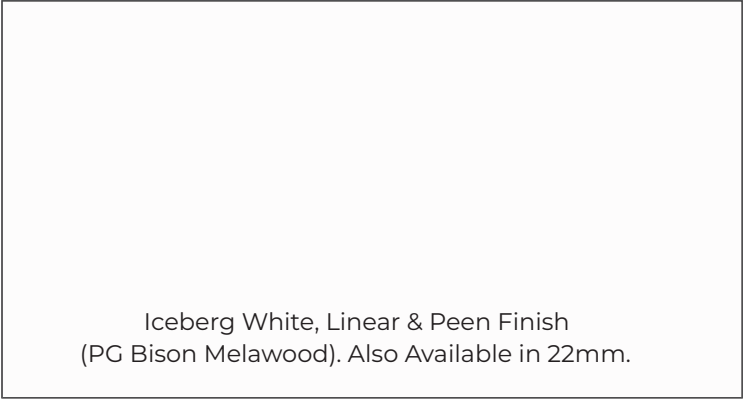

How to Ensure the Perfect Colour and Finish

To make sure your new Melamine furniture is exactly what you envision, please use this guide when ordering.

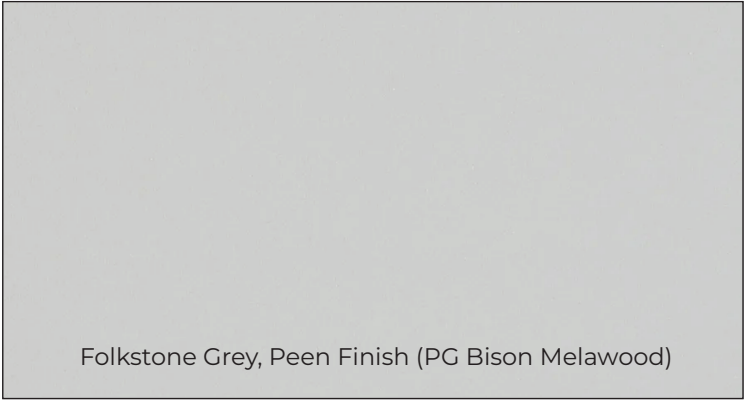

- **Specify Full Name & Finish:** Always provide both the full colour name and the specific finish type (e.g., "Iceberg White, Peen Finish"). This precision is required to prevent manufacturing errors, as many of our colours are available in multiple surface finishes.
- **Confirm with Physical Samples:** Colour matching is guaranteed only to our physical material samples. Digital representations on screens or in photos are for illustrative purposes only and are not colour-accurate due to variations in device calibration. Please ensure you or your client have approved a physical sample before placing a final order. Physical samples can be viewed at our showroom upon request. We recommend viewing larger samples where possible, as they provide a better representation of the beauty and grain variations across a full board; smaller samples often don't do the complete finish justice.
- **Custom Orders:** For any colours or finishes not listed in this guide, please request a formal quotation. Be aware that non-standard or custom orders are subject to different pricing and production lead times.
- **For 32 mm build-up tops,** where the bottom is not visible, Picco White will be applied to the underside. Where the bottom is visible, colour will be applied to both sides.

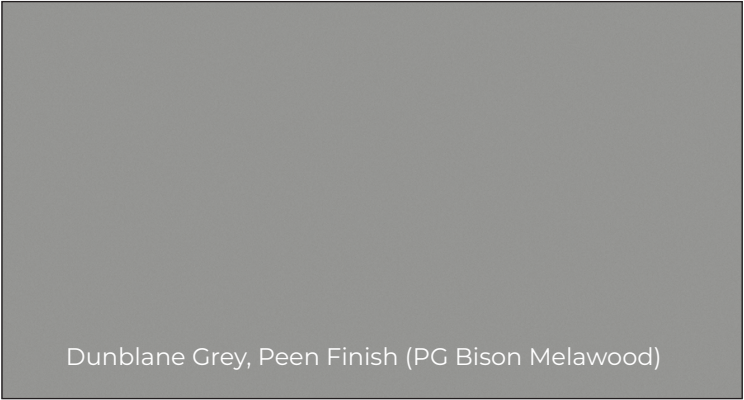

Picco White, Strata Finish (PG Bison Melawood)

Iceberg White, Linear & Peen Finish
(PG Bison Melawood). Also Available in 22mm.

Folkstone Grey, Peen Finish (PG Bison Melawood)
